SDEMAGROUP
SECURING YOUR FUTURE

Scope of Services

The Sdema Group serves Government and enterprise clients in a wide range of sectors in the Homeland Security arena. Following, please find a brief explanation of services that we offer per sector with some of the recent clients that we have been privileged to serve.

Aviation Security

Sdema and EL AL have formed a strategic alliance and are delivering comprehensive security upgrades to aviation authorities, airports and airlines worldwide. Our upgrades focus on the integration of technology, people and procedures and our leading team of aviation experts—with international experience confronting the shifting threats of the global terrorist network—has saved aviation and airport authorities millions of dollars with innovative, location specific solutions that deliver full ICAO compliance. Particular services include integrative surveys, gap analyses, advanced training for all security human resources, crafting pinpointed security procedures, introduction of new technologies for Hold Baggage Screening, document control and perimeter security.

Audit & Control

Audit & Control is a critical element of ensuring the effectiveness of security solutions and processes and should be an integral component of all security programs. As the resources of the global terrorist network, as well as local criminal elements, continue to grow, tactics shift and threats become more and more complex. An organization's human resources and physical surroundings change as well, creating new threats. Ensuring that an organization's security is robust and flexible and can be easily adapted to meet new challenges is the function of Sdema's Audit services that include penetration tests, red teams, etc…
